

Building bridges to your child's mind

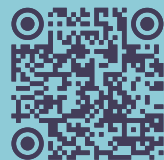

Your child sees the world from a unique perspective.

At Epic Minds Therapy, we're focused on meeting each child where they are at, using ABA therapy to gently guide them along the path to success and fulfillment.

Why ABA therapy?

ABA therapy is the gold standard of treatment for individuals with autism, proven to be effective in teaching essential skills, reducing unwanted behaviors and promoting communication.

all major insurances

Exploring the why behind the what

The root of ABA is understanding the 'why' behind your child's behavior. What triggers meltdowns? What is it about their favorite outfit that makes them so attached to it? In every interaction with your child, our skilled BCBA's and RBTs observe, pick up clues, and weave their findings strategically into the next therapy session.

How it works

1 Getting started

Get in touch. We'll listen to your story and discuss how we can help your child. (If your child hasn't been diagnosed yet, we can help you with that too.)

2 Assessing your child

A BCBA meets with you and assesses your child, getting down to their level to better understand their needs.

3 Planning therapy

With this insight, we work with you to create a treatment plan that's tailored to your child's needs, preferences and goals.

4 Starting sessions

Once the plan is approved by your insurance provider, we're ready to start therapy!
