How it works:

Simple steps towards incredible progress

***"You're talented. You're strong.
You are a hero."***

At Incredible Me ABA, we see the beauty and unlimited possibility within your child, and we're intent on bringing it out through personalized ABA therapy. With care and skill, our experienced staff use ABA strategy to empower your child with the skills they need to succeed — now and in the future.

***"Your differences are your superpowers,
not disabilities."***

We believe neurodivergence is a strength, not a limitation. We strive to help your child with autism to embrace their unique challenges as stepping stones to success.

What is ABA Therapy?

"You're getting better at this."

Applied Behavioral Analysis (ABA) is a scientific approach to changing behavior, based on observing current behaviors. A range of new skills and behaviors are taught by breaking them down into very small, doable steps, and reinforcing them with plenty of positive encouragement.

- ★ Communication
- ★ Social skills
- ★ Independence
- ★ Motor skills
- ★ Self care
- ★ Routines
- ★ Play
- ★ Sensory
- ★ Behavior

Initial Meeting

We take the time to understand your child's strengths, challenges, and goals.
