

How it works

01 → Start — it's simple

We start with a conversation about your child and your family's needs. No pressure or obligation, just empathy, answers and understanding.

02 → Assess — to inform planning

Next, a BCBA assesses your child to pinpoint their ability level and which barriers need to be overcome. Based on this, we work together to create a therapy plan.

03 → Therapy — where the magic happens

Once authorized by your insurance, we put the plan into action. A friendly, caring RBT comes to your home for regular therapy sessions, teaching your child the essential skills they need.

04 → Progress — let's celebrate it!

We're with you all the way; tracking progress, celebrating wins, and adapting the therapy plan as your child grows.

Hundreds of children have found their voice, independence and joy with ABA.

Let's help your child find them too.

Just reach out to get started.
