

How it works

1. Get a diagnosis

This is the first step to qualifying for ABA therapy coverage.

2. Reach out to us

Contact Argo ABA to begin intake. We'll guide you through insurance verification and answer any questions.

3. We assess your child

Our BCBAs conduct a thorough assessment to understand your child's behaviors and what makes them tick.

4. Therapy begins

We build a personalized plan and get started — in your home, on your schedule.

5. You stay in the loop

Regular updates, parent training, and ongoing adjustments keep you and your child moving forward together.

Get ABA therapy covered by Medicaid or your provider

We work with Medicaid and most major insurers to make sure cost never stands between your child and the care they need.
