

What is ABA?

ABA: Skills that stick, in real life

Applied Behavior Analysis (ABA) is a proven way to help children learn new skills, manage challenging behaviors, and feel more confident in their daily lives.

At Gradual, we don't just teach — we guide your child in ways that actually fit their world.

With ABA, your child can:

-  Communicate wants and needs more effectively
-  Build independence in daily routines
-  Strengthen social and emotional skills
-  Gain confidence to tackle new challenges

Every program is designed around your child's strengths, pace, and family life — no cookie-cutter solutions, ever.

Our Services

Therapy that meets your child where they live, learn, and play

In-Home Therapy:

Sessions in your child's own environment, so skills carry into daily life

Center-Based Therapy:

Helping children apply skills in real-world settings.

(Coming 2026)

Community-Based Therapy:

Practice real-world skills in playgrounds, stores, and other everyday settings

Parent Coaching:

Hands-on support to help you continue progress between sessions

Your roadmap to real progress

1. Talk:

We learn about your child and your family.

2. Observe:

We spend time with your child, seeing what motivates and challenges them

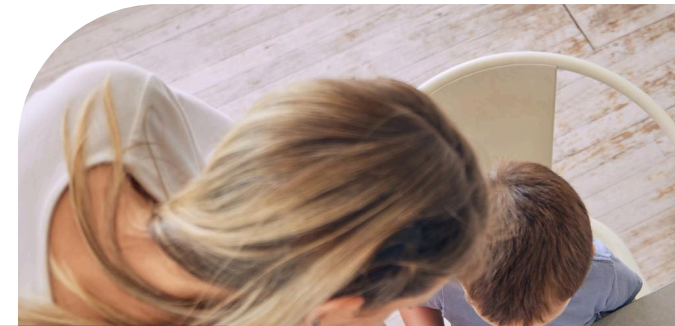

3. Plan

We create a personalized therapy plan that fits your family's life

4. Begin

Therapy starts in real-world settings with clear communication and a focus on meaningful progress
